Family – Emergency Preparedness Worksheet

This worksheet will help you make a plan for your family in case of a natural disaster or other emergency. Sit down with your family and fill it out together.

1. Who will we contact?

Name:

Number:

Note: It's helpful to choose the same contact person for all family members in case you aren't together when a disaster happens. Pick someone who lives in a different town than your family, because they may be easier to reach in case of a natural disaster. Text them, don't call. Phone lines might be tied up.

2. Where will we meet?

In our house:

In our neighborhood:

Out of town:

Note: Choose a safe place to meet up for protection. If you have pets or service animals, be sure to think of places that will allow them. Also, it's good to choose a place in your home, a place outside your home but in your neighborhood, and a place out of town so you're prepared for any situation.
